Conflict Minerals Declaration

Dear valued customer

As a global supplier of products, HydroQuip is aware of the obligation with regards to the laws and regulations of Conflict Minerals, as it specifically applies to the Dodd-Frank Wall Street Reform and Consumer Protection Act 1502

HydroQuip is not a publically traded company, and therefore is not directly subject to this law. However, we are making this declaration available to our downstream customers to help with awareness and compliance obligations our customers may need relative to reporting

HydroQuip does not directly source, import or process minerals such as Tin, Tantalum, Tungsten or Gold, and does not do business with the (DRC) Democratic Republic of Congo or its adjoining countries identified in the conflict region

This document declares that based on the unique requirements of construction, some products distributed by HydroQuip may contain one or more of the listed minerals and that these minerals are deemed necessary to product functionality.

HydroQuip supports its supplier's efforts to identify and eliminate the use of conflict minerals. Ultimately HydroQuip expects its suppliers to comply with the Conflict-Free Sourcing Initiative (CFSI) for both reporting and undertaking reasonable due diligence regarding their material sourcing efforts.
