## California Prop 65 Declaration

Dear valued customer

This declaration is to inform HydroQuip customers that products sold and distributed by HydroQuip may contain chemicals found in California's Proposition 65 Safe Drinking Water and Toxic Enforcement Act of 1986

By California State law, Proposition 65 requires HydroQuip to provide a clear and reasonable warning before exposing individuals to products containing chemicals known to cause cancer, birth defects or other reproductive harm

Most products sold and distributed by HydroQuip do not contain chemicals regulated under California's Proposition 65, and as such do not require advance notice or placement of product warning labels. However, items made from the California regulated chemicals listed below can sometimes be supplied with a HydroQuip product in concentrations confirmed to be above the safe harbor level as determined by the OEHHA

### HydroQuip Chemicals List:

1. Vinyl Chloride (CAS 75-01-4)

HydroQuip complies with California Prop. 65 regulations by supplying this declaration to customers and by also placing warning labels on all product cartons containing the declared chemicals. More information can be obtained on Prop.65 by going to [www.p.65warnings.ca.gov](http://www.p.65warnings.ca.gov)

HydroQuip will continue to monitor Prop 65 regulations in the future and agrees to promptly inform customers of changes and additions to the HydroQuip Chemicals List
